

Carousel

Video Messaging System
With Web Centric Access
By Tightrope Media Systems

Carousel is a web centric video messaging system for cable access and education facilities.

Designed from the ground up for these unique environments, Carousel's targeted design makes the task of maintaining a video messaging system a breeze.

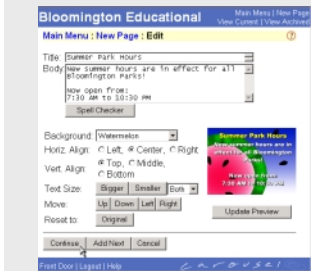

The key to Carousel's magic is its focus on access. Instead of developing a standalone application where only trained professionals are able to create messages, Tightrope Media Systems designed a web centric application with the ease of use required to give even untrained users full access to Carousel's capabilities.

A virtually unlimited number of users can be issued accounts. Each one is able to create and schedule messages independently. When a message is created, it's held for approval until the administrator authorizes it.

- ✓ Requires no special training: as simple as filling out a web form!
- ✓ Internet, Intranet, LAN/WAN accessible!
- ✓ Administrators have secure access to edit and approve all messages!
- ✓ Messages can crawl across the screen or change like slides!
- ✓ Photographs, graphics and video clips can be easily imported!
- ✓ Multiple Carousel systems can share messages via your network or the Internet!
- ✓ Secure access to the system through user IDs and passwords!
- ✓ Turnkey system includes rack-mount computer with keyboard, mouse and video output!

Sign In!

Create!

Schedule!

Creating pages is a snap! Give out as many user accounts as you need, and have your staff create messages, ready for your approval!

General Description:

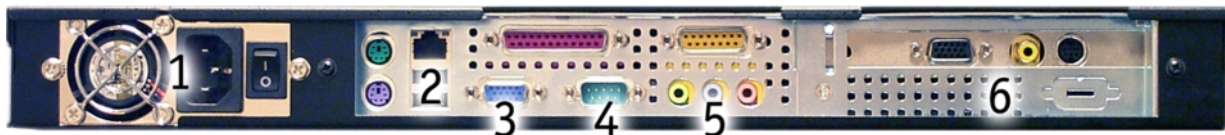

Turnkey, web centric video messaging system with integrated composite and S-Video output.

Physical Description:

- **Color:** Black
- **Dimensions:** 19"(W) x 19"(D) x 1.75"(H) (one rack unit)
- **Shipping Weight:** Approximately 27 lbs.
- **Keyboard/Mouse:** Standard 104 key keyboard, Standard Microsoft ® compatible mouse
- **VGA Monitor:** Not supplied
- **Power Supply:** 150W
- **Air Filter:** Removable and washable
- **Processor:** Greater than 900 Mhz Pentium III
- **Memory:** 128 Megs ECC or greater
- **Hard Drive:** Greater than 10 Gigs
- **CD-ROM:** Greater than 20X
- **Networking:** 10/100 Ethernet
- **General Connections:** Parallel Port, Two Serial Ports, 2 USB, Keyboard, Mouse, VGA
- **Video Output:** Composite or S-Video (4 Pin DIN) Output, NTSC or PAL, adjustable overscan
- **Operating System:** Microsoft Windows 2000 Professional®; Microsoft Internet Information Server 5®
- **System Software:** Tightrope Media Systems Carousel™ Version 3.0; Tightrope Media Systems Frontdoor™ Version 3.0
- **Database Engine:** Microsoft MSDE® Version 1.0

Optional Software Plug-ins:

- **Screen Saver for Carousel:** Per server site license; Macintosh and PC compatible
- **Event Display for Carousel:** Dean Evans and Associates EMS™ compatible plug-in for Carousel.
- **Cable Display for Carousel:** Automated cablecast schedule display for Carousel. Automatically formats cable schedules and inserts the pages within the Carousel Display.
