

Education

Whether you want a video channel on a few monitors or an advanced campus media network it is ready for you, off the shelf.

Audience™ at School

Campus communications by faculty, students and staff is now easy and efficient using Audience™. Whether you want a video channel on a few monitors or an advanced campus media network it is ready for you, off the shelf.

Audience™ provides flexible screen layouts, flexible delivery and display of content to video monitors, VGA monitors, plasmas, LCD's or added to your cable and satellite services for viewing in residences and throughout the campus. Immediately acquire announcements for minute-by-minute updates from faculty and students using online forms that come with your Audience™ system.

Link to data feeds

Audience™ software also enables the acquisition and display of internal or external data content from a wide range of sources such as news, weather, sports and business.

Emergency Messaging

Including school closures are now as simple as sending an email. Broad dissemination of content to all other media with one announcement is now a reality. Parents and community officials also have access to the automatically created, searchable Audience.web site.

Audience™ at Work in Education

High Schools, Colleges and Universities are experiencing the flexibility and affordability of Audience™ software while meeting a wide range of communication needs.
