

Corporate

Audience™ is proven to be an effective communication tool to reach staff and clients. Cost effective to own and operate.

Corporate, Training, Lobby, Call Centers & Desktop

Each day businesses need to effectively communicate with employees, customers and suppliers. Audience™ is proven to be the right business tool for immediate corporate communications on the job.

When the President wants to get a message out, it is as simple as email. When staff want to car pool it is effective, fast and cost effective. From the time your visitor walks into your lobby, to going up the elevator, to the cafeteria, and even in your health club you are selling and communicating.

Audience.web enables you to automatically create an online version of your in-house video channel for employees at their desk top or at home. By adding News, Financial, Sports and Weather data you can easily enhance the value of your service and ensure tune-in.

Audience™ at Work in your Corporation

An Audience™ Exclusive

All content created and approved to display on your video channel can be automatically re-purposed to an interactive website without any additional labor using Audience.web.

Because your audience
deserves the best.
