## Integrated Solutions for Kiosks and Digital Signage

WireSpring's product line offers a unified platform for deploying interactive kiosks and digital signage systems. Using our FireCast software, you can deliver applications such as dynamic retail signage, touchscreen product info centers, and employee benefits kiosks, enhancing the experience for patrons and employees alike.

The main components of the FireCast kiosk and digital signage suite are FireCast OS and FireCast ClientCenter. Built upon a robust Linux-based architecture, FireCast OS bundles a tamper-resistant software environment, customizable user interface, secure web browser, and versatile multimedia support with a plug-and-play operating system. FireCast OS works with regular PCs or is available preinstalled on the FireCast Media Appliance. FireCast ClientCenter provides web-based remote management tools for scheduling kiosk and signage content, monitoring device status, and generating reports. Plus, the same intuitive interface can be used to manage both interactive kiosks and dynamic digital signage systems. FireCast software requires no prior knowledge of Linux, and uses a familiar graphical interface for all administrative functions. FireCast products are available worldwide through a network of value-added resellers or directly from WireSpring.

The FireCast product line includes:

## FireCast OS

Software platform for interactive kiosks and digital signage systems

## FireCast ClientCenter

Remote management suite for digital signage and kiosk networks

## FireCast Media Appliance

Industrial media player hardware designed for 24x7 operation
